

## Our Mission

We believe botanical life and industrial satisfaction are not opposing forces.

**Responsible industrial demand actually strengthens agriculture.** Stable partnerships allow us to expand cultivation, introduce new species and continuously improve ecological standards.

Prospering botanical life feeds back into even greater B2B satisfaction.

This is the mission we stand behind:

**BOTANICAL LIFE.  
INDUSTRIAL SATISFACTION.  
IN CONTINUOUS MOTION.**

## Take a Sip of B2B Satisfaction

We talk a lot about B2B Satisfaction. So we decided to extract it.

Highly concentrated. Limited edition.

Available at our stand while supply lasts.

**Enjoy it. But be warned: partnerships with Satilive are addictive.**

# Satilive

## B2B Satisfaction.

# Our Finest Extract.

**You are looking for extracts.**

Premium CO<sub>2</sub> extracts: clean, controlled, reproducible.

But let's be honest. You are not only looking for extracts.

**You are looking for trust, stability and the peace of mind to sleep well at night.**

**SO WHAT ARE YOU REALLY SOURCING?**

## B2B Satisfaction. Our Finest Extract.

Some say the **rarest extract is saffron**. We disagree.

The purest and most elusive extract in this industry is **B2B Satisfaction**. And it just happens to be the one we refine best.

### What It Means in Practice

It means **we control the full chain**: from plant cultivation to final CO<sub>2</sub> extraction. As a farmer-owned company, we know the origin of our raw material. We extract **in-house**, under controlled parameters, with full batch traceability.

Every batch is laboratory tested and controlled at each production stage.

Documentation arrives complete, without repeated requests.

### Structured Yet Adaptive

Satilive is small enough to adapt to individual formulation needs, yet structured enough to ensure long-term stability of supply. As a European company **operating under strict EU quality and regulatory standards**, compliance is built into our process.

Botanical  
Life

Industrial  
Satisfaction

In  
Continuous  
Motion

SATILIVE™ was established by Panevėžio Aruodas, a farmer-owned cooperative in Northern Lithuania, uniting over 35 farmers and managing more than 15,000 hectares of arable land.

From that foundation, our state-of-the-art supercritical CO<sub>2</sub> extraction plant produces concentrated, full-spectrum extracts. To maximize quality and minimize environmental impact, we use no chemical solvents, and after each run the CO<sub>2</sub> is recovered and returned to the process in a closed loop.

### Our CO<sub>2</sub> Extract Portfolio

- Hemp
- Chilli
- Oregano
- Thyme
- Caraway
- Ginger
- Mint
- Clove
- Lion's Mane
- Sea buckthorn
- Hops
- Marjoram
- Ashwagandha
- Pine buds
- Cinnamon
- Bay leaves
- Savory herb
- Blackcurrant seed
- **and 50+ more**

Our portfolio extends well beyond the extracts shown, with the capability to source extracts from a wide variety of plant materials, including less common species.

All traceable,  
reproducible and  
controlled from  
plant to final  
profile.

### Industries We Serve

- Food & Beverage
- Cosmetics & Personal Care
- Pharmaceutical & Nutraceutical
- Flavor & Fragrance
- Animal Feed
- Functional Ingredient Industries
